

HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.

March 16

1880.

Dear Mr. Cus. de

840 = Castilleja pallida - just  
about the real thing. Not Ortho =  
Cupress castilleioides - as you say.  
Many things we have to prove  
off hand, from general recollection,  
and we often miss it

842. Eryngium patidatum.

770. & 774. I shall reach Eryngium  
before very long in my study for  
Helen. Then I will settle these  
two species. Many thanks for  
your notes & fresh specimens.

744. Cardamine hirsuta, Linna

The new edition of my Structural  
Botany has a chapter on what you  
want. I have the pleasure to send you  
a copy by this mail, & remain your  
oldest  
Asa Gray
